Fires.

GARDNER, Me., Oct. 17.

A house owned by J. S. Benson, and occupied by a Frenchman named J. Senier, was totally destroyed by fire to-day. Loss, \$600; partially insured. The fire was probably caused by a defective fuse.

Loss of a Fishing Boat and Two Men.

GLoucester, Mass., Oct. 17.

The fishing boat "Minnie Bell," containing two men, William H. Parker and William H. Meredeeux, left here on Sunday, to seine herring off Cape Cod, and have not been heard from since. They are probably lost. Parker leaves a wife and two children, and Meredeeux a wife and one child, in destitute circumstances.

U. S. Troops to be Sent to South Carolina to Protect her Citizens.

WASHINGTON, D. C., Oct. 17.

The following order was issued this evening, in pursuance of the action taken at the Cabinet meeting to-day, for the protection of public peace in South Carolina:

WAR DEPARTMENT, WASHINGTON, D. C., Oct. 17.

To W. T. Sherman, Commanding the U. S. Army:

See to it that the existing condition of affairs in South Carolina, there is a possibility that the proclamation of the President of this State may be disregarded. To provide against such a contingency, you will immediately order the available force in the military division of the Atlantic to report to Gen. Roper, commanding at Columbia, S. C., and instruct that officer to station his troops in such localities that they may be most speedily and effectively used in case of resistance to the authority of the United States. It is hoped that a collision may thus be avoided, but you will instruct Gen. Roper to let it be known that it is the fixed purpose of the Government to carry out the spirit of the proclamation and to sustain it by the force of the general and Federal troops, supplemented, if necessary, by the militia of the various States.

Very respectfully,
J. D. Cameron,
Secretary of War.

Seizure of a Railroad.

ST. ALBANS, Vt., Oct. 17.

This morning the Ogdensburg & Lake Champlain Railroad Company seized their road from the Central Vermont for non-payment of rent. Wm. J. Averill, Banker of Ogdensburg, was appointed receiver of the property. The central Vermont had notified employees to obey the receiver at present and until some other arrangement is made will transfer passengers and freight at Rouse's Point.

Providence house-holders are already banking their houses.

The S. J. Court will probably adjourn on Thursday or Friday.

George P. Dutton, Esq., County Attorney, is engaged before the Coroner's inquest, at Bucksport.

There will be a trot at Donauqua Park, on Saturday afternoon next. An exciting race and rare sport is anticipated.

Those who want a handy card of political figures, with check of election returns, should call at the Insurance office of C. C. Burrill, and get just what they will be glad to carry in their pockets.

On Sunday, instead of an Indian Summer's day, an old-fashioned Down East snow-storm prevailed. It snowed continually from sunrise to night-fall, and Monday was unusually cold. The snow in some places, still lies upon the ground.

There was a report in Bucksport on Tuesday that the shirt of Smith, the suspected murderer, had been found hidden in his cellar. It is thought to be true, and if so, is another link in the chain, which is being wound around him.

WHISTLING TO KEEP THEIR COURAGE UP. Democratic posters announce that there will be a meeting at the Democratic Club, to make preparations to celebrate their antislavery political revolution. Our friends will be most abundant in November. Let the funeral be largely attended.

A large and interesting temperance meeting was held at Hancock Hall, Sunday evening. The meeting was addressed by J. Taylor, of Lewiston, President of the Reform Club in that city, and Mr. Henry Hill, of Bangor.

Judge Libby has given universal satisfaction to the bar and parties during the present term of court, by the ability, fairness and dignity with which he presides. Business is dispatched promptly and thoroughly and yet there is no indication of haste nor impatience in trifling matters. The docket has been cleared of many old cases and all parties have had an opportunity to be heard. It is to be hoped that Judge Libby will again, at no distant day, hold court in this County.

The Steamer Charles Houghton on Thursday last, when on her inward trip to this city from Rockland, struck a sunken rock at the mouth of the river stranding a plank and commenced leaking badly. In a short time she filled and sank. All the freight on board was saved in good condition and her machinery was slightly damaged. On Saturday evening she was raised by the assistance of four vessels and got on to the beach. She has been partially repaired and is now afloat. She left for Rockland on Tuesday, where she will go on the railway and be thoroughly examined and repaired on Saturday or next week begin again her regular trips.

Mrs. Hoskins' Lecture.—The woman's Temperance Aid Society were addressed by Mrs. M. L. Hoskins of Oldtown, at Hancock Hall last Wednesday evening. The hall was well filled, both on the floor and in the gallery, and the audience was generally attentive. Mrs. Hoskins is a lady of fine address and manner, would secure a special attention anywhere. She has that essential element of all true oratory earnestness, to which she adds a simplicity which shows that she is no mere professional lecturer, but a true woman anxious to do a truly good work. Her account of the good done in Oldtown was deeply interesting and her counsel to the different classes of people who should join in such work was full of sound sense. One sentence of hers we would recommend to many for thoughtful and practical consideration, that she "would rather be one of the tried and fail than one of five hundred who stand by and do nothing." We can assure Mrs. Hoskins of a warm welcome whenever she shall come again with her womanly simplicity and refreshing, unpretending earnestness.

We learn that Mrs. H. proposes during the present winter to devote herself to the noble work in which she feels so much interest, and we cordially commend her services to Temperance organizations throughout the State.

Mr. Editor.—A few weeks ago, the notice of the death of Nephew T. Chastot appeared in the American. His aged parents wish to have his kind and filial love as a son remembered; his wife, his affection as a husband and father; his brothers and sisters, his love and cheerful ways, which made his presence a joy to the family circle; friends and acquaintance bear testimony to the rectitude of his character. When such a young man is taken away, although but few outside the family circle feel it, yet the community suffers a great loss.

The government proved that the above articles were found in resp'd possession on board a small vessel, of which they were possessed.

The defense was that the articles taken, were purchased by respondents of some persons to them unknown.

The jury found Respondents guilty of stealing the articles above named.

On the same day they were sentenced by the Court, to imprisonment in the State prison for the term of one year and six months.

Silas M. Dow v. Frederick Spofford.

Assumpsit for services performed by Piff. in Def.'s saw mill at Bucksport for six years, and for services in haying.

Def. contended and endeavored to prove that Piff. had been paid—that the services were not worth the sum at which they were charged and that he owed Piff. nothing.

The Surry Farmer's Club held their annual exhibition of farm products at Central Hall, near Morgan's Bay, on Tuesday, 10th inst. Several families in the immediate vicinity were afflicted with severe sickness which had its influence on the exhibition.

The show of stock was good. Oxen, cows, young cattle, horses and sheep were there and all were worthy of notice—see there were pigs, geese and hens.

Inside the hall there was really a fine display of field crops and garden vegetables. One field beet weighed 10 lbs. and there was a box of turnip beets, 21 lbs. from 27 square feet of land, at the rate of 34,000 lbs. or 550 bushels to the acre.

Potatoes in great variety and of fine appearance—large turnips, nice carrots—all combined, made a fine display of roots.

Squashes, pumpkins, tomatoes, grapes, beans, &c., in large variety and of fine quality, were pleasing to the eye. I saw no cheese, but butter, bread and apples, so that a good dinner might have been made without leaving the hall. There were beautiful flowers there, and one bouquet of feather flowers, brought over the brier deep, which would almost deceive the bees themselves.

There is not space to specify the quilts, rugs, stockings, mittens, yarn, cloth, and other kindred articles.

Among the specimens of mechanical industry were a toilet case, and a small foot chest, both of fine workmanship, made on shipboard, the former in a gale of wind. There was also a small steamboat (without steam) which being wound up, would move.

On the whole, the show was decidedly good, creditable and useful. Had I list of the entries, I would give a more full account, but perhaps when fairs are the order of the day, and the papers are crowded with notices of them, short articles like this will be more of a reading and be quite as profitable.

Let all the citizens, farmers and others, take an interest in these exhibitions, and do what they can to encourage them.

Religious services have been held at the old Baptist Meeting House in this town for several weeks. Rev. J. H. Taylor of Bluehill preaching each Sabbath. A good degree of interest prevails and it is contemplated holding a series of meetings which will probably commence next week.

The religious needs of this County are now receiving more attention than for some time past. The Baptist State Convention, and the Hancock Baptist Association having appointed Missionaries to labor in the county for the present year.

St. Dennis—South West Harbor.

The Ministers of the Hancock Baptist Association held a Quarterly Meeting at this place last week commencing on Tuesday and closing on Thursday evening. Sermons were preached by Rev. Messrs. Keese of Ellsworth, Taylor of Bluehill, Everett of North Sedgewick and Corbitt of Eden. There was a fair attendance and a good degree of religious interest. Rev. J. H. Taylor, who has been appointed by the Association to visit places in the County that are without regular preaching, also held a meeting at Seal Cove on Friday evening and appointed meetings there and at S. W. Harbor for the Sabbath but the weather prevented these.

Trenton.

Rev. Cushman Hardin, State Missionary is holding meetings at one or two places in this town and in Franklin and Hancock with good success; at the School house in Trenton on the Union Bay shore road there is a good revival of religious interest, which is steadily increasing.

Poetry.

The Fall Orick.

Two little grey wings
Making a lonely sound
A mournful wailing cry
Of earth's departing things
Along the dusky ground.

When twilight, cool and gray,
Creeps o'er the purple hills,
And the moonbeams fall
From near or far away,
The lowing voice of kine,
The croaking of the thrills,
From yonder hill-side rise,
Faint in an orange sky,
From pastures far or near,
And thickets dim, I hear
That homelike voice go by,
A sad, complaining sound,
To me it seems to say
How man is oppress'd and low,
How low in tears is down,
How all things pass away.

Thy youth is in its tomb,
That pleasant dream is o'er;
To thee its strength will come,
For thee its roses bloom,
No more, no more, no more,
Gone is the rose light
That over all things lay,
Making the bright and bright,
Making a starry night,
End in a sunnier day.

Graves, graves, a world of graves!
We cannot walk or stand,
Graves where the sunshine lies,
The woods, and where the waves
Break on the rocky strand.

Graves in the grassy dell,
Sunder within the soil,
Aman in the air, a knell,
In the heart a midnight bell
Making a deep and low.

In the east and west
The lone graves of our love;
Across the peaceful shore,
Are weary hands, and low
And the stars shine above.

Dear eyes, sweet faces here
Across the withered years,
Pines no longer green and true,
For younger men of green
Dim through our falling tears.

So in the haunted night
The singer sings to me,
Waileth all the hills are bright
And the moon, like a silent white,
Is pouncing a ghastly woe.

—Rev. T. H. Henshaw in the New York Evangelist.

Farm and Household.

The Mature Fila.

The farmer who does not feel a deep interest in the accumulation of manure is not to be found this side of the "Far West," as it is his bank from which he checks out his deposits that make his crops grow. But he to obtain a sufficient supply is the great question of the day. Commercial fertilizers cost a great deal of money, when extensively applied; and then often do not give satisfaction, especially in dry seasons. In brief, farmers must generally rely on their stable manure, which contains every constituent that crops require, and to obtain a good supply of this, all the live stock that farms will profitably sustain should be kept, and every pound of their manure should be saved that possibly can be. Much cows should be yarded at night, feeding them some green crop in their yard at evening, in brief, farmers must generally rely on their stable manure, which contains every constituent that crops require, and to obtain a good supply of this, all the live stock that farms will profitably sustain should be kept, and every pound of their manure should be saved that possibly can be. Much cows should be yarded at night, feeding them some green crop in their yard at evening, in brief, farmers must generally rely on their stable manure, which contains every constituent that crops require, and to obtain a good supply of this, all the live stock that farms will profitably sustain should be kept, and every pound of their manure should be saved that possibly can be.

Early Breakfast.

DON'T WORK UNTIL AFTER YOU EAT.

Breakfast should be eaten in the morning before leaving the house for exercise, or labor of any description; those who do it will be able to perform more work and with greater alacrity than those who work an hour or two before breakfast. Besides this, the average duration of life of those who take breakfast before exercise or work, will be a number of years greater than those who do otherwise. Most persons begin to feel weak after being engaged five or six hours in their ordinary avocations; a meal reinvigorates, but from the last meal of the day until next morning there is an interval of some twelve hours; hence the body, in a sense, is weak, and in proportion cannot resist the deleterious agencies, whether of the fierce cold of midwinter or of the poisonous miasm which rests upon the surface of the earth, wherever the sun shines on a blade of vegetation or a heap of offal.

This miasm is more solid, more concentrated, and hence more malignant, about sunrise and sunset than at any other hour of the twenty-four, because the cold of the night condenses it, and it is on the first few inches above the soil in its most solid form; but as the sun rises it warms and expands and ascends to a point high enough to be breathed, and being taken into the lungs with the air and swallowed with the saliva into the stomach, all weak and empty as it is, it is greedily drank in, thrown immediately into the circulation of the blood and carried directly to every part of the body depositing its poisonous influences at the very fountain head of life.

If early breakfast was taken in regions where chills and fever and ague prevail, and in addition, a brisk fire was kindled in the family room for an hour, including sunrise and sunset, these troublesome maladies would diminish in any one year, not tenfold, but a thousandfold, because the heat of the fire would rarify the miasmatic air instantly and send it above the breathing point. But it is "troublesome" to be building fires night and morning all summer. It being no "trouble," requiring no effort, to shiver by the hour daily weeks and months together.—Dr. Hall.

Setting the Table.

It may be from force of habit, but I think a table looks neatest with the plates put on face downwards; the napkins should be either be on top of the plate or in front of it, with the knife at the right side and the fork at the left. Set the larger and principal dishes in the center of the table, with the smaller ones around them; cups, spoons, milk, sugar, and everything used in serving the tea should be in front of the hostess and the water and glasses near some other member of the family, as it is too much for the hostess to attend to everything and gives too crowded an appearance to her part of the table.

It is a good plan, when sauce or preserves are to be served, to dish and place it at each place when setting the table, especially if the company is large, as it saves some confusion as well as liability to soil the table linen.

For crockery, glass-ware, cutlery, etc., of course people should use just what they can afford, remembering it is not so much rich material that gives a pleasing effect as the care with which they are arranged; butler will not look very tempting—even on a silver dish—when dished and spread all over it; or bread and cake on the finest china, if cut or broken in irregular places and thrown in a careless heap.

A handsome table depends a great deal upon this little matter of setting the table; bread, if cut in haggled slices, looks not nearly as wholesome as when evenly cut; by placing it flat on a table and using a knife with a blade long enough to reach the entire width of the loaf, one can make the slices of an even thickness; while if cut held in the hands, as some do, part of the slices will be thick at one end and taper to nothing at the other. Some always break up warm cakes, as they think cutting makes them heavy; but loaves ragged on the table. I never should be willing to do it; if baked early enough, as everything should be, so that it can set awhile before cutting, it will not be very heavy.

—N. E. Farmer.

Fall Plowing.

A correspondent gives his reasons for Fall plowing as follows:

"By experience and observation I am satisfied that all soils ought to be plowed in the fall, especially green sward, for several reasons:

1. The soil sods during the winter, and thus supplies the soil with nutriment ready prepared for the young crop.
2. The lumps become pulverized sooner, permitting the land to be stocked down in better shape.
3. A team can work much easier in the fall and the farm is less hurried. The action of the atmosphere upon the soil for a longer time is also beneficial.

A correspondent of an exchange discussing the fall plowing, says: "I have tried fall plowing on light and heavy soils. On light soils, which never produce cakes and clods, it does well. On heavy soils it is generally detrimental. It followed by a dry winter it sometimes succeeds; but commonly it produces a hard, cloddy soil, which is long in becoming mellow. I have known this hardness to last a full year afterward. Even when the land was thoroughly and evenly drained, this unfavorable result followed. It is therefore necessary to use caution in plowing heavy or adhesive land in autumn, and as a general rule it should be avoided."—Ex.

Manuring in Fall.

We have long since made repeated observations, confirming the truth that for many purposes manure is worth at least twice as much spread in autumn, as the following spring. Yet the practice is not uncommon with farmers, who may have manure lying in their yards through summer to await the drawing out till wanted the next season. Those who feed cornstalks for fodder find it too long and coarse to apply in the spring next after feeding out, but the heaps in which it should be thrown will be well rotted by September. It is then in perfect condition to be drawn and applied. It does most good on grass lands; and if these are intended to be inverted next spring for corn, it will give at least double the results produced by spring application. It will impart a vigorous start to grass intended to remain in pasture or meadow. The advantages will be two-fold—it will increase the grass all through the growing season of autumn, and thus produce a good winter manuring for the roots, and the wash of the manure by rains will run down the roots and become diffused in a more perfect manner through the soil, than could be accomplished by any mechanical means.—Country Gentleman.

EFFECT OF DARKNESS ON FRUIT.—The influence of darkness on the colors of fruits and flowers is sometimes remarkable, and different from supposed results. It was observed many years ago that some apples grown in Northern Ohio were colored with a higher red than the same sorts grown in the southern parts of the State, under longer Summers and a more nearly perpendicular sun. The effect of darkness on the coloring of Summer pears has been observed by fruit growers.—Fruitmen are nearly ripened on the sunny side of the tree assuming a much more brilliant red if placed in a dark drawer, a week or ten days before softening, than if exposed to light. Some curious facts have lately been brought out by Professor Sachs, of Wurzburg, relative to a similar influence of flowers. Bulbs grown and bearing flowers in a dark room presented natural hues; in a room had more yellow flowers in the dark; wall flowers had brighter blossoms; other plants had paler flowers; the effects were diverse with different plants. Such experiments would be interesting to repeat.

OLD PORK BARRELS.—Old pork barrels, whether taint or sweet, should be thoroughly cleaned before being used for new pork. A simple and effective method is to put in a peck of strong wood ashes and a couple of pails of water, and let it stand a day or two, then pour thoroughly with a stiff corn broom. The lye will take hold of the greasy particles with which it comes in contact, and the ashes, water and broom, will, if vigorously used, leave them as sweet as new barrels. Rinses in cold water all around the sides and wash clean; now rinse again in cold water and the work is done.

There are martyrs to headache who might be cured by using

Tarrant's Seltzer Aperient.

The stomach, overloaded with indigestible and unwholesome food, is the cause of headache, and the Seltzer Aperient, which it makes to act and remove the cause. The use of this aperient will carry off material, and almost immediately the offending cause. The disease is removed and the head ceases to ache.
